Computeranimation of IceBerg

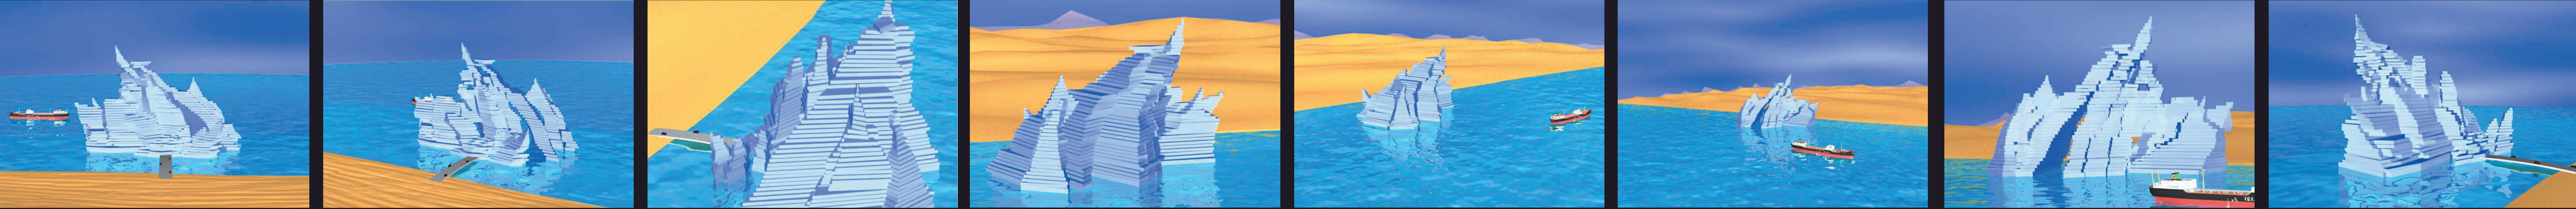

IceBerg

It is intended to develop an unique entertainment project in the Gulf-Area.The idea is to build an indoor ski-hall containing all leisure sports around snow and ice:
A ski-slop, 1000 meters long and 50 meters wide; a bobsleigh run, 800 meters long; ice hockey fields for inter-national competitions; half pipes and other facilities for snowboarding.
More over, ice-skating, sledge, holiday on ice and arctic zoo will be possible .
Restaurants, hotels, a shopping mall, a convention centre and a casino are included in the project as well.

The IceBerg is 180 meters high and the site is going to be about 80.000 square meter (250 by 315 meters).

The iconic architecture developed by Prof. Juerg Steiner is based on “Das Eismeer” (The Polar Sea) painting by Caspar D. Friedrich. He is the most popular romantic painter. “Das Eismeer” was painted in 1824. At Present it is one of the famous paintings located in the “Hamburger Kunsthalle”.
